Pedagogy and Pandemic: How the Contemplative Technopedagogy Framework can Enrich Teaching and Learning During Covid-19

Speaker: Justin Shanks, PhD, Adjunct Professor of Information and Society, Montana State University

Webinar Time: November 19th 2020 at 7am HST / 10am PST / 11am MST / 1pm EST

Given the widespread changes related to the ongoing COVID-19 global public health pandemic, teaching and learning are increasingly utilizing digital technology. Considering the scope, scale, and speed of these various changes, it is critically important to emphasize contemplation when making decisions involving technology and education. This webinar will introduce the Contemplative Technopedagogy Framework and explore how the framework can help food systems educators make pedagogical decisions about digital technology with intent to effectively and holistically enrich teaching and learning. While clearly applicable to current educational environments, this framework and associated topics are also entirely relevant to teaching and learning in post-pandemic contexts.

Join us on Zoom

Zoom Meeting ID: 857 4937 0091  Passcode: 9xcKqc
This sandbox webinar series for all Sustainable Food Systems educators provides professional development opportunities to gain, enhance, and share knowledge and skills regarding two pedagogical issues of this time:

(1) Justice, Equity, Diversity, and Inclusion (JEDI) and,

(2) Online teaching

Field experts will lead each webinar with the sharing of equity-minded pedagogical innovations. Sandbox sessions will facilitate space for reflection, brainstorming, ideation, and sharing of practices.

Facilitator: Selena Ahmed selena.ahmed@montana.edu
Associate Professor of Sustainable Food Systems, Montana State University
