National Digital Stewardship Alliance Geospatial Content Subgroup Conference Call
Wednesday October 24, 2012, 11:00 a.m. EASTERN

Agenda
Introductions
Presentation by Wayne Graham of UVA's Scholars' Lab
Discussion on next steps for geopreservation.org
If time: review collection development policy approaches from last call

We'll start the call with a presentation. Wayne Graham, Head of Research and Development at UVa's Scholars' Lab will discuss the approach they are taking in preserving, providing a discovery interface, and making scholarly use of their GIS datasets. For the past several years, they have been working with Open Source technologies to develop a GIS infrastructure for maintaining and enabling their collections through OGC-compliant web services. As part of their holistic approach, they have recently released Neatline, a plugin editor interface for developing rich, interpretive maps using the Omeka platform. He will discuss their overall strategy for working with GIS data, integrating maps in to interpretive frameworks, as well as his experience migrating data from different systems.

We'll then have an open discussion on the geopreservation.org website and hear the community's thoughts on an NDSA role in hosting or mainting the site moving forward.

If time, we'll briefly discuss touch on discussions from the last call on our collection development policy approaches.
